

At Westcon we pride ourselves on having the **biggest selection** of paving stone molds of any manufacturer in western Canada.

So if your large scale **commercial job** requires something unique contact one of our sales representatives for more information on our special order paving stones today.

Quadro

Bowtie

Octagon

Hexagon

Square

A few of the more than 1,000 possible laying combinations possible with these special order\* paving stones.

\*Westcon offers custom molds and colours where 50 or more pallets (>5,000 ft²) are required. Custom order charges will apply. Contact one of our sales representatives for details.

Accessories

Home Owners Tip:

Edge restraints are crucial in preventing lateral movement of paving stones and loss of bedding sand. Westcon offers a number of solutions to hold your paving projects in place for a lifetime.

How to test for a sealed or treated surface...

To find out if the concrete you're working with has been stained or sealed try this simple test: Sprinkle water onto the concrete surface. If the water beads up or doesn't appear to soak in, the concrete is either sealed or too smooth for staining (very smooth concrete needs to be roughened to take stain).

Mason's Select™  
Concrete Products

Concrete Cleaner- Removes grease and oil stains from concrete.

Clear Concrete Sealer- Gloss or Satin finish.

Transparent Concrete Stain- Assorted colours.

Home Owners Tip

Most sealers can be stripped with a methylene chloride based stripper, but if possible determine what sealer was used on the concrete and contact the manufacturer for recommendations about removal.

Granastar

Cement pigments.

Use Granastar products when mixing concrete, mortar, stucco, or grout for colourful finishes.
