

All of Westcon's precast steps are made to measure. We offer a choice of three step options, and three options for finishing. With the exception of the Bullnose Finish, exposed kick is only available in Calgary. The step you choose can be finished in any of the three available finishing treatments.

Step 1 - Choose your step

Universal steps

Decks

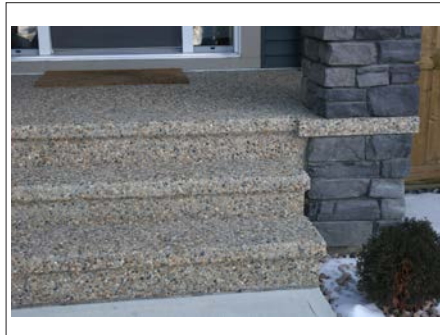

Recessed Decks

Step 2 - Choose your finish

Broom

Bullnose

Exposed

Considerations:

- > If your home design includes stone or brick veneer along the side of the step, you will need to order a recessed deck.
- > Broom finish creates texture on the surface so they will be slip resistant.
- > If risers are not the same width as the landing, then a deck is recommended.
